Het onderste profiel moet volledig ondersteund zijn door een stabiele ondergrond, die niet kan verzakken. (bv zandcement).

Le profilé inférieur se pose sur un sol stable, qui ne risque pas de s'affaisser, de façon que le profilé est complètement supporté. (p.e. sable-ciment)

Ein stabiler Untergrund, der sich nicht senken kann, soll überall das untere Profil unterstützen. (z.B. mit Zement verfestigter Sand)

The base profile must be placed firmly on the ground. It's important the ground can't subside. (e.g. sand-cement)

Elke paal, ook elke begin- en eindpaal moet voorzien zijn van 2 U-profielen (1 U-profiel indien bevestigd tegen een muur).

Chaque piquet, aussi le premier et le dernier, doit être pourvu de deux profilés U (1 profilé U si fixé contre un mur).

Jeder Pfosten, auch der erster und letzter, muss mit zwei U Profilen ausgestattet werden (1 U Profil falls gegen einen Wand befestigt).

Each post, also the first and the last one, must be equipped with two U-profiles (only 1 U-profile, if fixed to a wall)

Versterkingsprofiel onder en boven voor correcte afstand tussen 2 palen.

Profilé de renforcement en haut et en bas pour distance correcte entre 2 piquets.

Verstärkungsprofil oben und unten für den genaue Abstand zwischen 2 Pfosten.

Top and bottom fortification profile for the correct distance between 2 posts.

Laatste controle met waterpas + vullen met snelbeton  
Dernier contrôle avec niveau + remplir avec du béton rapide  
Letzte Kontrolle mit Wasserwaage + füllen mit Schnellbeton  
Final check with level + fill with fast setting concrete

Na uitharden beton, bovenste verstergingsprofiel + govaclips verwijderen (niet onderste).

Après séchage du béton, enlever le profilé de renforcement supérieur + govaclips (pas inférieur).

Nach Trocknen des Betons, oberer Verstärkungsprofil + govaclips entfernen (nicht unterster).

When the concrete is dry, remove the top fortification profile + govaclips (not the bottom).

Het onderste profiel moet volledig ondersteund zijn door een stabiele ondergrond, die niet kan verzakken. (bv zandcement).

Le profilé inférieur se pose sur un sol stable, qui ne risque pas de s'affaisser, de façon que le profilé est complètement supporté. (p.e. sable-ciment)

Ein stabiler Untergrund, der sich nicht senken kann, soll überall das untere Profil unterstützen. (z.B. mit Zement verfestiger Sand)

The base profile must be placed firmly on the ground. It's important the ground can't subside. (e.g. sand-cement)
